**Customer Problem Statement Matrix:**

| Problem Statement (PS) | I am (Customer) | I'm trying to | But | Because | Which makes me feel |
|---|---|---|---|---|---|
| **PS-1** | A busy freelance consultant or young professional working on a laptop | Store, organize, and quickly retrieve client and professional network contacts | Most existing solutions are locked to mobile apps or are overly complex enterprise CRMs | I need rapid, frictionless desktop access to my contacts while managing client workflows | Frustrated, disorganized, and wasting valuable time switching devices |
| **PS-2** | A student or remote networker | Keep track of peers, mentors, and project collaborators with custom tags | Contact info is scattered across fragmented messaging apps, emails, and local text files | There is no centralized, secure, web-accessible address book with instant search capabilities | Overwhelmed by digital clutter and worried about data privacy |
