   - SAMVEL M & mssamvel777@gmail.com
   - SATHISHKUMAR B & baskersathishbaskersathish@gmail.com

Empathy Map Canvas: An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to helps teams better understand their users.

Empathy Dimension	**FitSense AI – Personalized Fitness Recommendations Powered by AI User Perspective (Freelancers, Students, Professionals)**
What does he THINK and FEEL?	• "Why is it so difficult to find my client contacts while working on my laptop?" • Worried about data privacy and the security of stored personal credentials. • Aspires to maintain an organized, professional network effortlessly without administrative clutter.
What does he HEAR?	• Colleagues recommending bloated, expensive enterprise CRMs. • Peers complaining about lost contact numbers scattered across messaging apps.
What does he SEE?	• Cluttered messaging apps, unorganized local note files, and fragmented spreadsheets. • Mobile-only address books that do not fit laptop/desktop development workflows.

What does he SAY AND DO?	• Constantly switches between phone and laptop just to retrieve phone numbers or email IDs. • Manually searches through past emails and chat histories. • Expresses the need for a clean, fast, web-accessible contact manager.
Pain	• Fragmented contact records spread across multiple platforms. • Lack of desktop-friendly search, filtering, and tag-based organization. • Security risks associated with unencrypted local text notes.
Gain	• Centralized, secure digital contact repository. • Instant search and tag-based categorization. • Complete data privacy and peace of mind while managing professional networks.
