    - SATHISHKUMAR B & baskersathishbaskersathish@gmail.com

Solution Architecture Overview:

FitSense AI – Personalized Fitness Recommendations Powered by AI bridges the gap between disorganized local contact data and structured backend services through a robust 3-tier MVC architecture.

- **Client Layer:** Sends HTTP requests from Postman or a frontend app.
- **Server & Routing Layer:** Express.js parses requests, and authentication middleware validates JWT tokens.
- **Business Logic & Persistence:** Controllers process contact operations and persist structured data into MongoDB collections using Mongoose ODM.
